1	JMcB - Iphone via Expo project	User instructions pop up - i.e how to add food to plate i.e double click so it turns yellow (or mention in help section), then click on plate to add %	N	Best solution is to use the help screen provided in the navbar, but we will revamp this to contain more pertinent information	08/03/2019		
4	JMcB - Iphone via Expo project	love the link to choose my plate.gov. - well done	Y	Thank you :)	08/03/2019		sorry - just realised this is an american link - is there a UK equivalent? I presume we dont need permission to link to websites? I'll check with Mike - www.nhs.uk/live-well/eat-well
6	JMcB - Iphone via Expo project	On submission of plate the list comes up of nutrients etc which is great - but makes no sense. Can this also be displayed of % of daily dosage or what 1/3 of % of daily dosage should be? i.e. = % of your daily dosage or daily dosage should be etc - because to be honest I dont think I would know or what I need to improve upon otherwise?	Y	Percentages added based on how much of the daily recommended amount a player has on their plate (can be more than 100%)	08/03/2019		is this 100 % daily recommended allowance/intake or a 1/3 of the daily amount - just to clarify - might need to make that clear on the screen - can you put a message above saying 1/3 or 100% of allowance- it is is a 100% of daily intake can you put a header above the Your Plate Nutrients to say this meal = 1/3
7	JMcB - Iphone via Expo project	Score page - a description of how points are calculated / awarded? Is a high score good? I don't understand what the aim / target is. Should we have something here also saying or hinting how to improve?	Y	Maximum score added so as to suggest to the player how far away from a perfect score they are. This alongside with the percentages added above and warning messages on the score screen (shown right) should give ample information for a player to improve, however I will try to think of further improvements	08/03/2019		Still not to sure on this, initially a low score is bad and a high score v good? a wee statement like this would be good if that is the case.
9	JMcB - via Android	cannot add food via the icons round the side i.e. Apple bread drink can	Y	Currently being implemented			
10	JMcB - Iphone via Expo project	so I have 29% eggs and 71% boiled Brocoli I get a message saying my Vt B1 levels are too low, no message saying anything else is within range or good? I don't feel I am learning anything. Can what is good be added in.	Y	Will add messages for nutrients that are especially good, current assumption is if there is no warning message then you are somewhat close to the range expected			great thanks the colour coding is great and very useful as is the well done message. not too sure about the word dangerously though - its a bit severe. is it easy to replace with "too low" or just "low" if just under?
11	JMcB - Iphone via Expo project	Saved plates not displaying	Y	Currently being implemented			Excellent - possible for future development but can I delete only selected plates not them all?
12	JMcB - Iphone via Expo project	be to call the saved plates a name i.e chicken n mash or eggs n chips	Y	Player's can name their plates now			
14	JMcB - Iphone via Expo project	21 % potatoes mashed, with butter, 61% peas in unsalted water, 18% chicken breast/steak coated/baked = 558.7 calories etc. Submitted: score 7850 after 4 adjustments - score is coming down - but what is target, carbs are too high - but how much over am I? a pop up tip or bar chart or %	Y	Can add a % of how much over/under a player is			Great but will need to know if it is over or under.
15	JMcB - Iphone via Expo project	in relation to point 13, I tweaked the plate got score down to 7143, making 6 adjustments, 15% potatoes, 10% chicken, 75% peas calcium score is too low - pop up tip for suggested foods with whatever is lacking? I then added a glass of milk reducing peas to 51% but how much milk am I drinking - would it be possible to display grams next to the % so you get a rough idea of what is being consumed. (on the food list /back to plate bit)	N	Suggested foods would be a cumbersome task that wouldn't fit the short time we have remaining.			is it possible to build in a pop up that just lists foods that contain XX I just googled vitamin B1 and got a list of foods - if this is technically too difficult then fine or include a link - see links in row 44?

Feedback No	User	Comment	Possible to change Y/N	Students response	Change made date	Complete	Further Question
17	JMcB - Iphone via Expo project	13% sunflower seeds, 16% pumpkin seeds, 27% cherries, 44% greek youghurt = 1183.8 calories score of 963 point? How is this low? Calories, too high, fats too high, protien too high, sugar too high, satfat too high; b1 too low, b9 too low - after tweaking 10% sun flower, 9% pumpkin, 46% cherries, 35% youghurt - 885.5 calories and 3693 points? why now only sugars high, sat fat, high, b1, low, b9 low but not telling me what is good pick a food you eat and see if you can learn anything from it being 100%. Then add something else in - see what you learn and why / how you learned.					
19							
21	JMcB - Iphone via Expo Project	On submission of plate - too high or too low no indication of how far out - dont suppose you could add in a red/amber/green square/colour to give a hint on what is too far out to show if you are improving or not					
25	JMcB - Iphone via Expo Project	Need more detailed info on the help page, I will discuss intro and explanation with Mike / Laura. can you create a rules page in addition	Y	Help screen is now more detailed	12/03/2019		see row 39 - dont worry if you are out of time now
26	JMcB - Iphone via Expo Project	Help page ...The plus button allows you to look for foods - there is no plus button - its a search? then the plus minus button appear on the slider	Y	Help screen is now more detailed/has been fixed for the new updates we've made	12/03/2019		ok thanks
27	JMcB - Iphone via Expo Project	can you create a rules page in addition to the help page - I think more explanation around points/tweaking and 1/3 of a meal etc s required	Y	We can integrate this onto the help screen	12/03/2019		
29	JMcB - Iphone via Expo Project	it is possible to delete something from the recently selected list?	Y	Added a button in settings to clear all foods in the recently searched list	12/03/2019		Dont want to clear all, just the random stuff that I added in to try make a balanced plate - the frequently used list is brill and it would be cumbersome if all previously searched items were deleted. I undertand if it is techincally to complex to do individual items but something to bear for tweaking after project
34	JMcB - Android phone	The apple, bread, youghurt, drink icons have a plus sign but not working at present i.e. cannot add	Y	Side items now implemented	12/03/2019		Doesnt seem like these affect the calories or nutrients or scores?
35	JMcB - Iphone via Expo Project	The apple, bread, youghurt, drink icons dont have a plus sign	Y	Removed plus icon as they seemed unnecessary and the greyed out foods are intuitive enough	12/03/2019		OK but see row 34
36	JMcB - Android phone	Unable to clear plate although it does reduce all items to 0% but all foods are still listed below. On Iphone it clears the list and lets you start anew.					This seems to have been resolved after re-fresh.
39	JMcB - Iphone and Android	<p>Intro? The aim of this game is to see how good you are at preparing a healthy balanced meal.</p> <p>The optimal score is 13,000 points – if you achieve this score you have successfully created the optimum requirement of calories and nutrients, on your first attempt. (MAX is this correct?)</p> <p>Each plate you create equates to 6-800 calories 1/3 of your daily recommended intake. This is based on the assumption you eat 3 x meals a day comprising of a total of 1800-2400 calories. (MAX - I’m unsure of this = confusing – recommended amounts for women are 1800 and men are 2500, how do we know what the app is working out? can you clarify or do I need to speak to Mike to clear up?)</p> <p>Add your ingredients to the plate to see if it is balanced, if not make tweaks, and try improve upon the proportions/calories and nutrients.</p>		13000 points is the maximum possible, that means you're getting the perfect amount of every nutrient. For calories and several other nutrients, there is a range that defines what your nutrient intake for that meal should be. For example, anywhere between 16-25g of fat on your plate is considered a "perfect" score. This then allows people of all sorts to aim for the same goals.			

Feedback No	User	Comment	Possible to change Y/N	Students response	Change made date	Complete	Further Question
40	JMcB - Android	The clear plate bar is too large in comparrison to the last +- increase food button and every time - I try to increase/decrease the last item I keep getting clear plate message - can the clear plate be made into a button rather than if you touch anywhere the clear screen being activated?	Y	Clear button lowered and touch radius decreased - should be harder to accidentally press now			
42	JMcB Iphone and Android	Link to Vitamin and Mineral - show foods that contain X, Y Z: <a href="https://www.nhs.uk/conditions/vitamins-and-minerals/">https://www.nhs.uk/conditions/vitamins-and-minerals/</a>  Link to Sugars - <a href="https://www.nhs.uk/live-well/eat-well/how-does-sugar-in-our-diet-affect-our-health/">https://www.nhs.uk/live-well/eat-well/how-does-sugar-in-our-diet-affect-our-health/</a>  Link to Calories- <a href="https://www.nhs.uk/common-health-questions/food-and-diet/what-should-my-daily-intake-of-calories-be/">https://www.nhs.uk/common-health-questions/food-and-diet/what-should-my-daily-intake-of-calories-be/</a>  link to info re Carbs - <a href="https://www.nhs.uk/live-well/healthy-weight/why-we-need-to-eat-carbs/">https://www.nhs.uk/live-well/healthy-weight/why-we-need-to-eat-carbs/</a>  link to fats - <a href="https://www.nhs.uk/live-well/eat-well/different-fats-nutrition/">https://www.nhs.uk/live-well/eat-well/different-fats-nutrition/</a>  General good link = <a href="https://www.nhs.uk/live-well/eat-well/">https://www.nhs.uk/live-well/eat-well/</a>  Good link to breaking down the food groups i.e. dairy / fish/pulses etc <a href="https://www.nhs.uk/live-well/eat-well/the-eatwell-guide/">https://www.nhs.uk/live-well/eat-well/the-eatwell-guide/</a>	Y	Added to help screen (final page)		Y	Great thanks
43	JMcB Iphone and Android	can the can of soda be swapped out with a glass of water/milk?	N	Water doesn't add any nutrients, so we think soda is a more common item that people might have with their meal. In future development I'd like to have dropdown menus for each item to provide more customisability.
